Art Unit: 1771

1. Claims 50-62 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 65-87 of copending Application No. 10/134,971 in view of Charboneau, U.S. Patent No. 10/134,972. US '971 discloses an internal lining tube comprising a substantially fluid impervious inner layer, a permeation barrier and a composite layer which is exterior to the internal liner layer. US '971 differs from the claimed invention because US '971 does not teach incorporating sensors into the lining. Charboneau teaches incorporating sensors into pipe linings as set forth above in order to monitor the pipeline for possible problems and enhance the safety of the pipeline. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated a sensor into the pipe lining of '971 in order to enable the monitoring of the pipeline and detect potential problems in order to make the pipe lining of '971 more safe.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

2. Applicant's arguments filed 10/11/05 have been fully considered but they are not persuasive. Applicant argues that the provisional obviousness-type double patenting rejection should be withdrawn since claim 65 is directed to a liner that has both an inner layer and permeation barrier while the instant claims do not require a permeation barrier. However, the composite material which makes up the composite layer corresponds to the claimed permeation barrier. Therefore, the rejection is maintained.

3. Claims 1-49 are allowed.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
